Art Unit: 1763

1. Claims 1-3, and 5-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

-The scope of the preamble in claim 1 is not commensurate in scope with the body of the claim. (i.e.-The preamble recites a method for patterning a thin dielectric film while the body of the claim fails to recite such a feature.);

-The wording used throughout paragraph 3 of claim 1 is written in a very confusing manner, and should be reworded. (i.e.- For example, what constitutes "...an unnecessary portion..."? Also, how is "...a thickness of the dielectric film provided under the grain boundary..."?); and

-Claim 3 is redundant upon claim 1.

2. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

3. Any inquiry concerning this communication should be directed to examiner
